Solving Your Citation Problems: EndNoteWeb and ResearcherID

October 19, 2011

My citation needs were not being met.

- I wanted my reference collection to be:
  - Neatly organized,
  - Searchable,
  - Easy to access full article,
  - Shareable with colleagues and groups,
  - Easy to add new references to,
  - Insertable into documents
    - with correct formatting,
    - automatically compile reference list,
  - Exportable to other citation management programs.
- EndNote Web does all this, and is free (for LLNL)!

ResearcherID brings additional benefits.

- ResearcherID
  - Provides unique identification for each scientist:
    - get credit for what you have published,
    - distinguishes you from others with similar names,
    - leads others to your pubs in obscure places,
  - Generates best available citation statistics:
    - # of publications,
    - citation rate,
    - h-factor,
- EndNote Web, ResearcherID, and Web of Knowledge are closely linked products of Thomson Reuters.

Cite While You Write™

Use the EndNote Web Plug-in to insert references, and format citations and bibliographies automatically while you write your papers in Word. The EndNote Web Plug-in also allows you to save online references to your library in Internet Explorer for Windows.

See Installation Instructions and System Requirements.

○ Download Windows with Internet Explorer plug-in
○ Download Windows MSI for mass program installation
○ Download Macintosh

Firefox Extension

Use the EndNote Web toolbar in Firefox to save online references directly into your library.

See Installation Instructions and System Requirements.

○ Download Windows/Macintosh

Internet Explorer and MS Word helpers are combined.

Most features work outside LLNL.

- Accessible from outside LLNL:
  - EndNoteWeb,
  - ResearcherID,
  - Web of Knowledge (through LLNL library, so needs VPN).

- NOT Accessible from outside LLNL:
  - Links to Journal articles (unless you have own access),
  - Web of Knowledge (but see above).

- References in Word files can be seen by other people, but not updated (unless they have EndNoteWeb too).

EndNoteWeb and ResearcherID aren't perfect.

- They cannot:
  - cook bacon & eggs,
  - fetch the newspaper (but can fetch academic papers),
  - include papers
    – 'submitted',
    – 'in press',
    – published yesterday
      (it takes Web of Knowledge a few days to get updated,
  - include books, and chapters,
  - include government reports,
  - include conference presentations (proceedings are OK).
- Actually, any reference can be input manually, but may not be worth the effort.

Summary

- EndNote Web is:
  - Neatly organized,
  - Searchable,
  - Shareable with colleagues and groups,
  - Easy to add new references (1-click),
  - Exportable to other citation management programs,
  - Insertable into documents.
- ResearcherID
  - Provides unique identification for each scientist,
  - Generates accurate citation statistics.

FAQ

FAQ (#1)

Moving/copying reference between folders, including ResearcherID folders (also see FAQ #2).

a) Go to your main EndNoteWeb page,
b) Go to folder you want to move/copy reference from,
c) Tick the box for the reference(s) you want to move/copy.
 – Don't click on the reference to see its details (the move/copy option will be lost)
d) Select the folder, including ResearcherID folder, you want to move/copy the references to.

NOTE: This will usually *move* the reference, but will *copy* if the destination is to/from a ResearcherID folder from/to an EndNoteWeb folder.

FAQ (#2)

Copying/Duplicating a reference (also see FAQ #1).

a) Go to your main EndNoteWeb page,
b) Go to folder you want to copy reference from,
c) Tick the box for the reference(s) you want to copy
d) Click on the 'Copy to Quick List' button.
e) Go to the 'Quick List' folder then move the reference to the desired second folder.
